

Governments today face mounting pressure to deliver transparent, efficient, and citizen-centric services. Yet, fragmented data, siloed systems, and manual reporting often delay decision-making. Decision Intelligence brings together analytics, AI, and real-time insights to empower public leaders with evidence-based governance and faster, more impactful outcomes.

Challenges

Lack of Real-Time Performance Visibility

No Uniform Metrics for Scheme Effectiveness

Operational Delays from Outdated Information

Limited Tools for Interpreting Public Sentiment

Disconnected Systems Obstructing Unified Intelligence

Our Solution Offering

Integrated Governance Dashboards

Unified view of performance, resources, and public initiatives for data-driven decision-making.

Policy Simulation & Forecasting

Predict policy outcomes and assess impact using advanced AI and scenario modeling.

Citizen-Centric Analytics

Measure welfare scheme effectiveness and identify gaps in service delivery.

Financial & Resource Intelligence

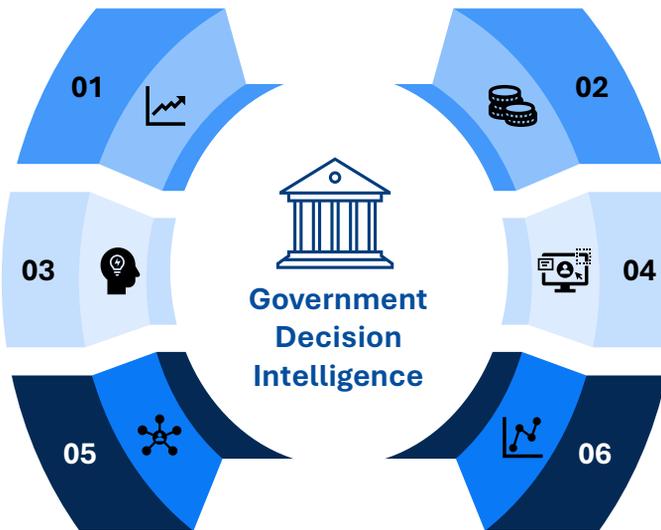

Track budgets, allocations, and expenditures to maximize fiscal efficiency and accountability.

Live Performance Tracking

Monitor KPIs and program execution in real time for proactive interventions.

Complaint Trend Analysis

Detect recurring grievances and service gaps to improve citizen satisfaction.

Key Benefits

- Evidence-based policies backed by real-time data.
- Clear visibility of projects and outcomes for stakeholders.
- Increased public trust through accountability.

- Optimal allocation of funds, workforce, and assets.
- Early detection of inefficiencies and wastage.
- Data-driven budgeting and fiscal planning.

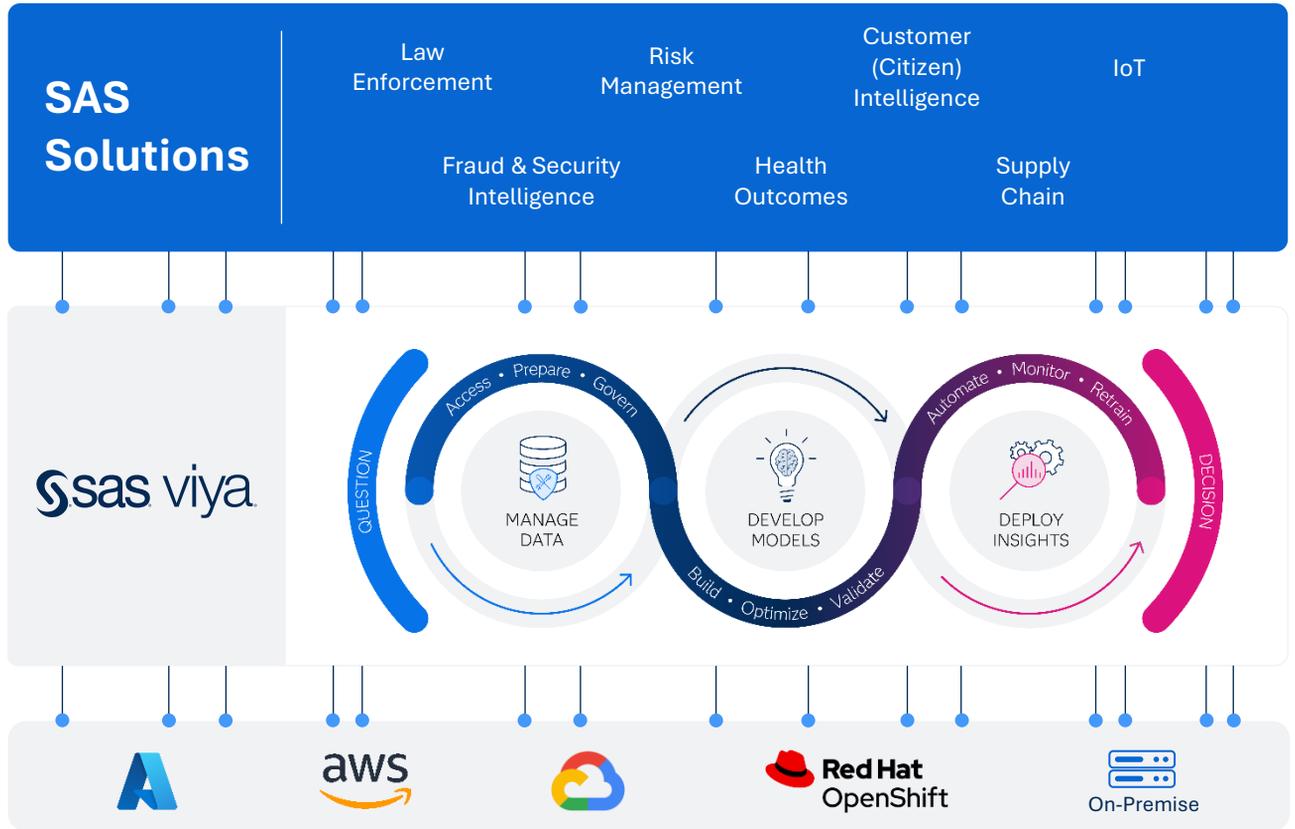

- Improved welfare delivery with performance monitoring.
- Anticipates citizen needs through predictive analytics.

- Forecasts trends and simulates policy outcomes.
- Rapid response to crises or anomalies.
- Strategic long-term planning supported by data.

SAS Viya : Unified Data to Decision Platform

AI Implementation across industries

- Enterprise **fraud detection** with AI
- Graph-based **AML compliance** intelligence
- Early warning systems** with ML-Ops
- AI-enabled **capital and risk forecasting**

Banking & Financial Services

- Tax and Revenue Compliance** to curb fraud and boost revenue
- Intelligent document processing using **GenAI**
- Social Benefits** Program Integrity
- Urban Mobility Intelligence**

Public Sector Offerings

- AI/ML-based **claims fraud detection**
- AI-led **dynamic underwriting** models
- Intelligent **Text and Image Analytics**
- SAS **Dynamic Actuarial Modeling (DAM)**

Insurance Analytics Offerings

- Golden Batch** optimization for yield consistency
- Automated APQR** for faster regulatory reporting
- SAS LSAF** integration for compliant R&D workflows
- Clinical Research** excellence using SAS APro

Pharma & Life Science Offerings

- Process optimization** with AI models
- AI-led **inventory forecasting** systems
- Predictive **quality control** analytics
- Autonomous planning** with ML-Ops pipelines

Manufacturing Offerings

- GenAI-powered **product recommendations**
- Dynamic pricing** strategies using AI
- Customer **behavior prediction** models
- Supply chain insights** using ESG aligned AI

Retail & Consumer Goods Offerings

India (HQ)

Shivatik Satyamev,
1023, 10th Floor, Sardar Patel
Ring Road, Ahmedabad,
Gujarat,
India

Dubai

Royal Palm Business Center,
Of 13-696 Building name
