

Ensure fair, transparent, and targeted welfare

Social benefit programs are vital for citizen welfare, yet often face fraud, duplicate beneficiaries, and fund leakages. Traditional checks are slow and reactive, leading to misuse and reduced trust. With Analytics and AI, governments can verify eligibility, detect anomalies in real time, and ensure benefits reach the right people efficiently and transparently.

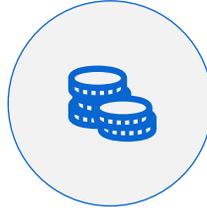

Challenges

Duplicate or Fake Beneficiaries

Fraudulent Claims

Leakage & Misallocation

Limited Real-time Monitoring

Data Silos Across Agencies

Our Solution Offering

Social Scheme Monitoring

Analyzes revenue inflows and patterns to identify leakages and improve collection efficiency.

Budget Management Analysis

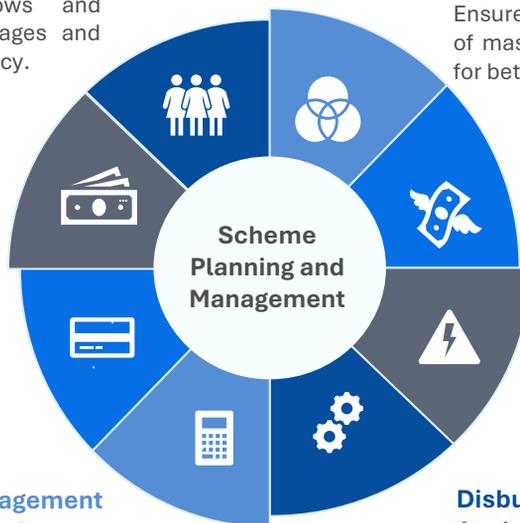

Monitor allocations v. expenditures, enabling better planning & preventing budget overruns.

Payment Analysis for Concurrent Audit

Validates payments in near real-time to detect duplicate, irregular, or non-compliant disbursements.

Accounting Management System

Provides a centralized view of accounts, improving financial transparency and compliance.

Master Management Analysis

Ensures consistency and accuracy of master data across departments for better decision-making.

Revenue Analysis

Analyzes revenue inflows and patterns to identify leakages and improve collection efficiency.

Commitment Analysis & Warning System

Tracks financial commitments against budgets and triggers alerts to prevent overspending.

Disbursement Engine Analysis

Automates and validates disbursement flows to improve efficiency and accountability.

Key Benefits

- Ensures welfare schemes reach genuine beneficiaries.
- Detects irregularities in payments and disbursements early.

- Prevents budget overruns with real-time allocation vs. spending analysis.
- Improves financial forecasting through accurate commitment tracking.

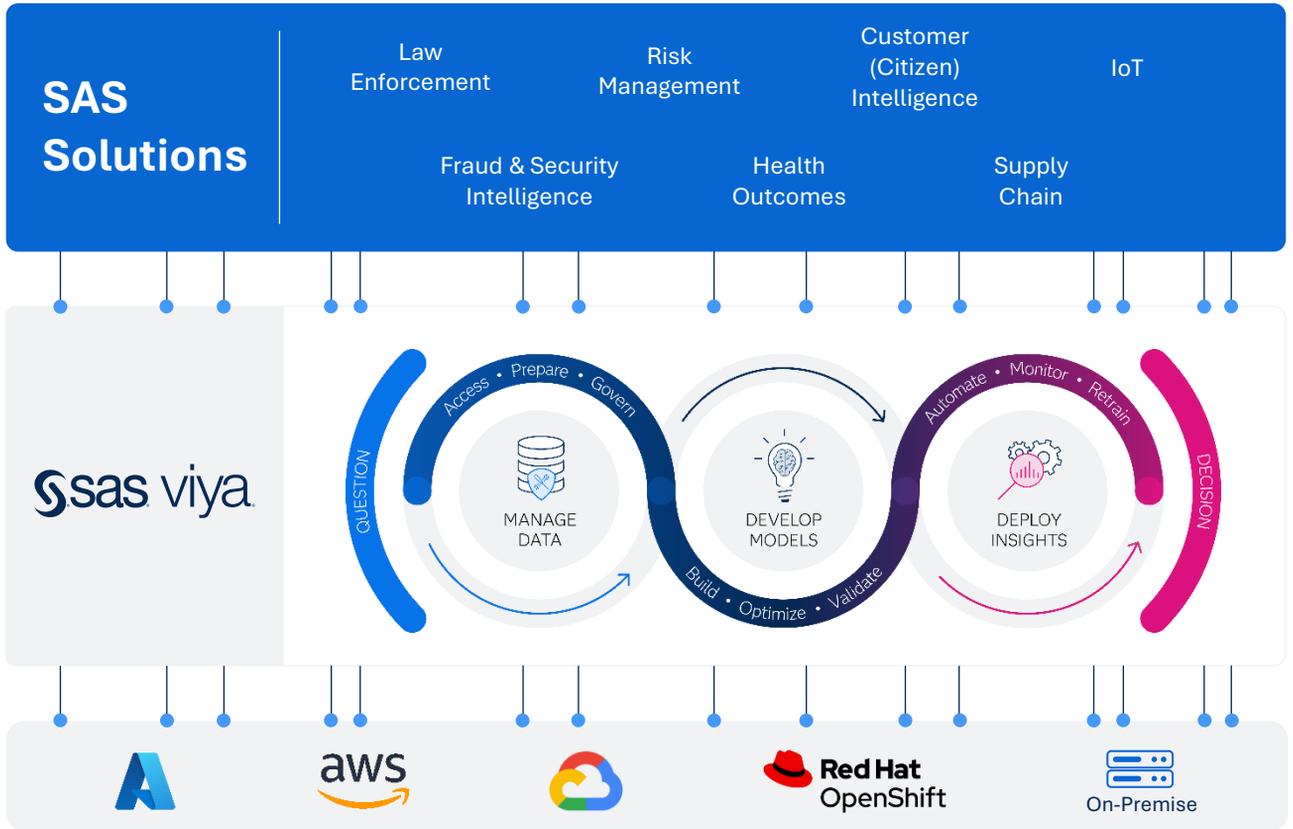

- Identifies duplicate or unauthorized payments in real-time.
- Flags inconsistencies in beneficiary and master data.

- Reduces manual workload through automation of disbursements and audits.
- Provides a single source of truth for scheme and financial records.
